Subject: Importance of proper handling of Reactor spent fuel

Part of Records Package / Supplement / Correction

Dear Sir:

Federal laws were passed that required DOE to accept and place in repositories the spent fuel from domestic nuclear reactors. DOE has yet to meet this important responsibility. As a voter in Illinois, I want to see the spent fuel sent to repositories, not piling up in shipping casks at nuclear power plant parking lots. The shipping casks are safe for now, but they were meant for shipping to a repository. I hold our government accountable for completing the promise made to accept spent fuel in a repository rather than giving in to excuses. I am held accountable to deliver on promises my company has made every day on my job, and you must do the same for our government. Thanks.

John Freeman
